SOFTWARE DEVELOPER

PROJECTS

1. E-commerce Web Application (MERN)

An e-commerce web applications dedicated to creating an exceptional online experience for the new generation.

Features:

- **User Registration:** Enabling guests to register as users is a fundamental feature of the application.
- **JWT Authentication:** The system incorporates JWT authentication, distinguishing permissions for guests, users, and administrators.
- **CRUD Operations:** Administrators have the capability to Create, Read, Update, and Delete products seamlessly.
- **Form Validation:** The system ensures robust data validation during user registration and product uploads.
- **Upload Product:** Users can effortlessly upload product images through a user-friendly drag-and-drop interface, with specified file types and limited file sizes.
- **Search Products:** Users can conveniently search for products using keywords such as name or product code.
- **Pagination:** Implementing a page segmentation system for efficiently retrieving product data from the server.
- **Add to Cart:** Seamless functionality allows users to effortlessly add products to their shopping carts.
- **Cart Summary:** Users can easily view a comprehensive summary of items in their shopping cart.
- **Stripe payment:** Integration of the third-party Stripe payment system for secure and efficient transactions.
- **Responsive Web Design:** The user interface is designed to be mobile-friendly, ensuring optimal user experience across various devices.

Utilized technologies:

- React.Js, Tailwind CSS, Node.Js, Express, MongoDB
