

# APIWAT LEELASAWATSUK

SOFTWARE DEVELOPER

## PROJECTS

### 1. Project: **Merry Match App (Team Project @TechUp#4)**

Merry Match is an innovative online dating website designed for people seeking connections, friendships, or that special someone.

#### Developed features:

- Implemented features enabling the admin to perform Create, Read, Update, and Delete (CRUD) operations on Merry Packages.
- Developed a backend REST APIs using Express.js and PostgreSQL to enable admin users to perform CRUD operations on Merry Packages.

#### Utilized technologies:

React.js, Tailwind, Formik, Chakra UI, Node.js, Express, Supabase(PostgreSQL)  
<https://merry-match-client.onrender.com>

### 2. Project: **Portfolio App**

**Description:** Designed and Developed a responsive and dynamic portfolio web application showcasing my professional journey, skills, and projects.

**Utilized technologies:** React.js, Tailwind CSS

<https://apwlife.netlify.app>

### 3. Project: **ToDo App**

**Description:** Built a simple React TodoList app with a clean UI, using functional components, custom hooks, and real-time alerts for efficient task management.

**Utilized technologies:** React.js, Tailwind CSS

<https://apwtodo.netlify.app>

### 4. Project: **Ecommerce App**

**Description:** Built React e-commerce app with dynamic product listings, cart functionality, and real-time price updates. Utilized state management for seamless user interactions.

**Utilized technologies:** React.js, Tailwind CSS
